

Turn Your People Data Into Insights that Matter to the Business

Build winning teams with AI insights

We help you connect people data with business context — enabling confident decisions at every stage of the talent lifecycle.

01

Trusted science, powered with AI

Grounded in 70 years of validated psychometrics, AssessioAI uses advanced AI to translate assessments and organisational data into clear, contextual insights.

02

Make smarter, fairer people decisions

AssessioAI brings together all people data — from assessments to performance results — and analyzes it against the business context to enable confident, bias-free talent decisions.

03

Empower growth with personalised insights

From onboarding plans tailored to how each person learns, to development suggestions, AssessioAI helps individuals grow. It ensures everyone has guidance to thrive and add value.

How it works

AssessioAI connects science, data, and AI to make talent insights actionable in four simple steps:

Assess →

Gather validated psychometric, organisational, and people data (CVs, performance data, and more) to create a reliable foundation.

Analyse →

AI models combine behavioural science with business context to reveal strengths, risks, and opportunities.

Match →

AssessioAI selects the right data for the question at hand — ensuring insights are always relevant to the role, decision, and context.

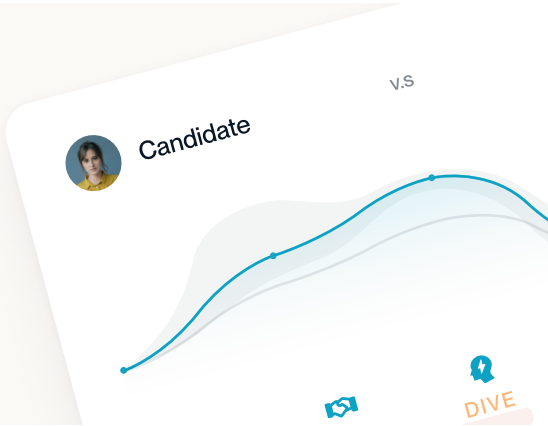

Act

You get personalised briefs, onboarding plans, or other talent guides automatically — all designed to fit seamlessly into daily workflows.

Scalable Talent Development

Personalised, actionable coaching and development plans based on full assessment data. Effectively grow individuals and boost team performance, bringing executive-level development to mid-level managers without needing expensive consultants.

Confident Hiring Decisions

Get a clear, evidence-based summary of each applicant's strengths and areas for growth. Helping you make confident, fair, and data-driven hiring decisions that reduce risk and improve future performance, leveraging combined data from CVs, psychometrics, and 360s.

Talent Intelligence Hub

A centralised platform to securely share, review, and analyse all your people data. Ensuring teams are aligned, transparent, and make informed decisions, reducing risks by spotting strengths and challenges early on.
